

Tutorial: Repairing Drawer Tracks

1. ALWAYS CHECK YOUR FURNITURE BEFORE PURCHASING! Don't purchase pieces with missing tracks
2. Remove your drawers.
3. Remove the backing of your furniture using a flathead screwdriver or a pry tool and hammer. Be sure not to damage the backing. Remove staples from backing.
4. Replace missing or stripped screws in the drawer track. **If the holes are too stripped, glue down the track with wood glue.**
5. Reapply backing with a staple gun.
6. Now you have working drawers and your furniture is ready for cleaning and painting!
