

Tutorial: Painting Lettering

1. Assuming your piece is properly prepped, apply your base coat using a Dixie Belle Synthetic Mini Brush.
2. With chalk, draw the lettering of your choice centered onto your canvas. If not centered, wipe away with a damp towel and try again.
3. Using the appropriate size brush, begin tracing your lettering. Pay attention to the ends of your letters, keeping them unified.
4. Go back over with another coat, building on the thickness and perfecting all edges. Let dry.
5. Using a small pointed brush, apply your highlights (using the light method) with the color of your choice, keeping the ends of each highlight pointed. Refer to the video for brush selection and application tips.
